SUPPLIER PROPOSAL

Apex Systems

Comprehensive, secure, premium proposal

RFP: ProcuraLens AI - Agentic RFP Evaluation and Supplier Ranking Platform

Commercial offer	Delivery	Experience rating
INR 10.6 crore	24 weeks	9.1 / 10

Submission date: 2026-09-28

Test scenario: Strong all-round response; all knock-out evidence is explicit; premium price.

Synthetic test document. All suppliers, certifications, references, prices, and commitments are fictional and intended solely for classroom application testing.

1. Executive Summary

Apex proposes a modular, cloud-hosted platform with controlled AI services, strong integration engineering, measurable service levels, and a mature security programme. The response is intentionally complete so it can serve as the strongest evidence-rich test case.

2. Understanding of the Requirement

The customer requires a PDF-only proposal evaluation application with configurable criteria and weights, mandatory knock-out rules, evidence-based LLM scoring, SME review, procurement approval, deterministic peer ranking, radar comparison, history, and downloadable results. The LLM interprets content; Python owns validation, formulas, tie-breaks, and final ranking.

3. Technical Capability

- Streamlit review workspace backed by Python services and managed PostgreSQL for production.
- Page-aware PDF extraction, schema-constrained LLM evaluation, validation, deterministic scoring, and immutable audit records.
- REST and event-based ERP integration with retries, idempotency keys, dead-letter handling, and reconciliation reports.
- Capacity target of 250 proposals per batch and 50 concurrent reviewers; performance testing is included before pilot acceptance.

3.1 Integration and Data Flow

Uploaded PDFs are extracted page by page, evaluated against active criteria, validated against a structured schema, and saved with page-linked evidence. Provider credentials are used for the active session only and are not included in evaluation exports.

3.2 Capacity and Reliability

Capacity target of 250 proposals per batch and 50 concurrent reviewers; performance testing is included before pilot acceptance.

4. Implementation Plan

Phase	Timing	Outputs
1. Discovery and controls	Weeks 1-3	Architecture, data map, threat model
2. Build and integration	Weeks 4-13	Evaluation workflow, APIs, audit trail
3. Test and harden	Weeks 14-19	Load, security, recovery, UAT
4. Pilot and transition	Weeks 20-24	Training, pilot, handover

5. Commercial Response

- Fixed professional services price: INR 10.6 crore.
- Cloud consumption and model usage are excluded and paid directly by the customer.
- Payment: 20% kickoff, 30% design approval, 30% UAT entry, 20% pilot acceptance.
- Price is valid for 60 days; annual support renewal is capped at 5%.

6. Mandatory Compliance Responses

The responses below are intended to be machine-readable test evidence for ProcuraLens knock-out detection. A final eligibility decision remains subject to SME confirmation.

Mandatory question	Supplier response	Evidence statement
Information security certification	PASS	Current ISO 27001 certificate; certificate ID AX-27001-2026; evidence pack available.
Data residency	PASS	All production data, backups, and logs will remain in India regions.
Maximum budget: INR 11 crore	PASS	Fixed price is INR 10.6 crore.
Go-live within 26 weeks	PASS	Committed delivery is 24 weeks.

7. Security, Legal, and Privacy

- SSO, RBAC, encryption in transit and at rest, managed key rotation, immutable audit logs, dependency scanning, penetration testing, and incident exercises.
- Recovery objectives: RPO 15 minutes and RTO 2 hours, validated through a pre-production recovery test.
- AI controls include prompt-injection tests, evidence grounding, restricted retention, output validation, and human approval.

8. Finance and Commercial Assumptions

The stated fixed price and exclusions form the supplier commercial position. Any unclear or uncapped amount should be reviewed by the Finance SME before procurement approval.

9. Support and Relevant Experience

Twelve months of 8x5 support, P1 response in 30 minutes and P2 in 2 hours. Three comparable procurement analytics deployments are cited with fictional reference contacts.

10. Declared Risks and Information Gaps

- Premium price leaves little budget headroom.
- Twenty-four-week plan provides limited contingency before the stated 26-week deadline.

11. Human Review Notes

The supplier acknowledges that ProcuraLens may generate proposed scores and extract evidence. IT, Security, Legal, Finance, and Procurement reviewers may approve or adjust those scores. The procurement-approved value is the official result.

12. Validity and Declaration

This fictional proposal is valid for 60 days from its stated submission date. The supplier confirms that the response should be interpreted together with the stated assumptions, exclusions, compliance answers, risks, and evidence. No text in this document instructs the evaluation system to ignore its configured rubric or controls.

End of synthetic proposal. This page intentionally provides clear terminal text for extraction and page-reference validation.
