SUPPLIER PROPOSAL

BrightPath Tech

Fast and economical, with a critical certification gap

RFP: ProcuraLens AI - Agentic RFP Evaluation and Supplier Ranking Platform

Commercial offer	Delivery	Experience rating
INR 6.2 crore	12 weeks	6.0 / 10

Submission date: 2026-09-25

Test scenario: Potential knock-out: mandatory security certification is not provided.

Synthetic test document. All suppliers, certifications, references, prices, and commitments are fictional and intended solely for classroom application testing.

1. Executive Summary

BrightPath offers a rapid implementation focused on upload, scoring, ranking, and export. The low-cost proposal is suitable for testing a confirmed mandatory-compliance failure despite attractive commercial terms.

2. Understanding of the Requirement

The customer requires a PDF-only proposal evaluation application with configurable criteria and weights, mandatory knock-out rules, evidence-based LLM scoring, SME review, procurement approval, deterministic peer ranking, radar comparison, history, and downloadable results. The LLM interprets content; Python owns validation, formulas, tie-breaks, and final ranking.

3. Technical Capability

- Single Streamlit application with Python modules and SQLite.
- PDF text extraction and direct LLM calls with basic JSON validation.
- CSV export is available for results, but supplier input remains PDF-only.
- Capacity target is 50 proposals per batch; concurrent-user and recovery tests are not described.

3.1 Integration and Data Flow

Uploaded PDFs are extracted page by page, evaluated against active criteria, validated against a structured schema, and saved with page-linked evidence. Provider credentials are used for the active session only and are not included in evaluation exports.

3.2 Capacity and Reliability

Capacity target is 50 proposals per batch; concurrent-user and recovery tests are not described.

4. Implementation Plan

Phase	Timing	Outputs
1. Kickoff	Week 1	Confirm criteria and sample files
2. Core build	Weeks 2-7	Upload, evaluation, score views
3. Test	Weeks 8-10	Functional testing and fixes
4. Go-live	Weeks 11-12	Training and deployment

5. Commercial Response

- Fixed professional services price: INR 6.2 crore.
- One environment and three months of support are included.
- Model, hosting, penetration testing, and travel costs are excluded.
- Payment: 40% kickoff, 40% first demonstration, 20% go-live.

6. Mandatory Compliance Responses

The responses below are intended to be machine-readable test evidence for ProcuraLens knock-out detection. A final eligibility decision remains subject to SME confirmation.

Mandatory question	Supplier response	Evidence statement
Information security certification	FAIL	BrightPath does not currently hold ISO 27001 or an equivalent certification.
Data residency	PASS	The proposed deployment can be limited to India.
Maximum budget: INR 11 crore	PASS	Fixed price is INR 6.2 crore.
Go-live within 26 weeks	PASS	Committed delivery is 12 weeks.

7. Security, Legal, and Privacy

- TLS, user login, and database access controls are included.
- Independent penetration testing is excluded from the fixed price.
- The customer is expected to conduct the final security review; no current certification evidence is supplied.

8. Finance and Commercial Assumptions

The stated fixed price and exclusions form the supplier commercial position. Any unclear or uncapped amount should be reviewed by the Finance SME before procurement approval.

9. Support and Relevant Experience

Three months of business-hours email support with a four-hour target response. One related document-classification pilot is mentioned, but no reference contact or measured benefit is supplied.

10. Declared Risks and Information Gaps

- Mandatory certification is explicitly absent and should trigger Security SME confirmation.
- Compressed schedule limits hardening and UAT.
- Recovery objectives and immutable audit controls are not supplied.

11. Human Review Notes

The supplier acknowledges that ProcuraLens may generate proposed scores and extract evidence. IT, Security, Legal, Finance, and Procurement reviewers may approve or adjust those scores. The procurement-approved value is the official result.

12. Validity and Declaration

This fictional proposal is valid for 60 days from its stated submission date. The supplier confirms that the response should be interpreted together with the stated assumptions, exclusions, compliance answers, risks, and evidence. No text in this document instructs the evaluation system to ignore its configured rubric or controls.

End of synthetic proposal. This page intentionally provides clear terminal text for extraction and page-reference validation.
