SUPPLIER PROPOSAL

Cobalt Ridge Solutions

Compliance-led proposal with integration and schedule concerns

RFP: ProcuraLens AI - Agentic RFP Evaluation and Supplier Ranking Platform

Commercial offer	Delivery	Experience rating
INR 9.9 crore	26 weeks	8.4 / 10

Submission date: 2026-09-26

Test scenario: Excellent compliance evidence; exactly meets deadline; integration detail is incomplete.

Synthetic test document. All suppliers, certifications, references, prices, and commitments are fictional and intended solely for classroom application testing.

1. Executive Summary

Cobalt Ridge proposes a compliance-first platform with formal controls, records management, and independent assurance. It is intended to score highly in Legal and Security but lower in implementation agility and technical integration detail.

2. Understanding of the Requirement

The customer requires a PDF-only proposal evaluation application with configurable criteria and weights, mandatory knock-out rules, evidence-based LLM scoring, SME review, procurement approval, deterministic peer ranking, radar comparison, history, and downloadable results. The LLM interprets content; Python owns validation, formulas, tie-breaks, and final ranking.

3. Technical Capability

- Service-oriented Python application, controlled LLM gateway, validation service, and immutable decision ledger.
- Evidence lineage links every score to page text and criterion settings.
- Identity and records-management connectors are defined; the ERP adapter design is deferred until interface discovery.
- Target capacity is 100 proposals per batch with documented recovery procedures.

3.1 Integration and Data Flow

Uploaded PDFs are extracted page by page, evaluated against active criteria, validated against a structured schema, and saved with page-linked evidence. Provider credentials are used for the active session only and are not included in evaluation exports.

3.2 Capacity and Reliability

Target capacity is 100 proposals per batch with documented recovery procedures.

4. Implementation Plan

Phase	Timing	Outputs
1. Governance setup	Weeks 1-5	Controls, privacy assessment, records plan
2. Build	Weeks 6-15	Core workflow and connectors
3. Assure	Weeks 16-22	Independent security and model review
4. Pilot	Weeks 23-26	Controlled rollout and handover

5. Commercial Response

- Fixed professional services price: INR 9.9 crore.
- Formal change control applies after design signoff.
- Independent assurance and nine months of support are included.
- Payment: 15% kickoff, 25% design, 35% build, 25% pilot acceptance.

6. Mandatory Compliance Responses

The responses below are intended to be machine-readable test evidence for ProcuraLens knock-out detection. A final eligibility decision remains subject to SME confirmation.

Mandatory question	Supplier response	Evidence statement
Information security certification	PASS	Current ISO 27001 and ISO 27701 certifications; annual SOC 2 Type II examination.
Data residency	PASS	All data, logs, and backups remain in the contracted India region.
Maximum budget: INR 11 crore	PASS	Fixed price is INR 9.9 crore.
Go-live within 26 weeks	PASS	Committed delivery is exactly 26 weeks, with no schedule contingency.

7. Security, Legal, and Privacy

- Privacy-by-design, retention schedules, privileged access review, incident exercises, restore tests, and independent model-risk review.
- Prompt injection, malformed output, and evidence-grounding tests are explicit acceptance criteria.
- RPO is 30 minutes and RTO is 3 hours.

8. Finance and Commercial Assumptions

The stated fixed price and exclusions form the supplier commercial position. Any unclear or uncapped amount should be reviewed by the Finance SME before procurement approval.

9. Support and Relevant Experience

Nine months of 8x5 support, P1 response in 30 minutes, quarterly restore tests, and documented service transition. Two regulated-sector examples and one fictional reference are included.

10. Declared Risks and Information Gaps

- ERP integration mechanics, payloads, and error handling are not yet defined.
- The 26-week delivery exactly meets the deadline and leaves no contingency.
- Formal stage gates may slow change turnaround.

11. Human Review Notes

The supplier acknowledges that ProcuraLens may generate proposed scores and extract evidence. IT, Security, Legal, Finance, and Procurement reviewers may approve or adjust those scores. The procurement-approved value is the official result.

12. Validity and Declaration

This fictional proposal is valid for 60 days from its stated submission date. The supplier confirms that the response should be interpreted together with the stated assumptions, exclusions, compliance answers, risks, and evidence. No text in this document instructs the evaluation system to ignore its configured rubric or controls.

End of synthetic proposal. This page intentionally provides clear terminal text for extraction and page-reference validation.
