SUPPLIER PROPOSAL

NexaWorks

Balanced proposal with ambiguous residency wording

RFP: ProcuraLens AI - Agentic RFP Evaluation and Supplier Ranking Platform

Commercial offer	Delivery	Experience rating
INR 8.7 crore	18 weeks	8.6 / 10

Submission date: 2026-09-29

Test scenario: Ambiguous knock-out: primary data is in India, but global backup wording requires Legal review.

Synthetic test document. All suppliers, certifications, references, prices, and commitments are fictional and intended solely for classroom application testing.

1. Executive Summary

NexaWorks presents a balanced implementation with clear governance, acceptance gates, and adoption support. The data-residency wording intentionally creates an UNCLEAR result that requires human interpretation.

2. Understanding of the Requirement

The customer requires a PDF-only proposal evaluation application with configurable criteria and weights, mandatory knock-out rules, evidence-based LLM scoring, SME review, procurement approval, deterministic peer ranking, radar comparison, history, and downloadable results. The LLM interprets content; Python owns validation, formulas, tie-breaks, and final ranking.

3. Technical Capability

- Layered document, evaluation, validation, ranking, persistence, and presentation services.
- Dynamic criteria, Pydantic validation, bounded repair, warning capture, and deterministic formulas.
- ERP REST adapter supports bulk and incremental supplier synchronization.
- Comparable deployment handled 150 proposals per batch and 30 reviewer sessions.

3.1 Integration and Data Flow

Uploaded PDFs are extracted page by page, evaluated against active criteria, validated against a structured schema, and saved with page-linked evidence. Provider credentials are used for the active session only and are not included in evaluation exports.

3.2 Capacity and Reliability

Comparable deployment handled 150 proposals per batch and 30 reviewer sessions.

4. Implementation Plan

Phase	Timing	Outputs
1. Mobilize and design	Weeks 1-3	Backlog, architecture, success metrics
2. Incremental build	Weeks 4-10	Three demos and automated tests
3. Integrate and validate	Weeks 11-14	ERP, UAT, reconciliation
4. Pilot and adopt	Weeks 15-18	Training, pilot, hypercare

5. Commercial Response

- Fixed implementation price: INR 8.7 crore.
- LLM and hosting charges are paid by the customer.
- Optional OCR pack: INR 35 lakh.
- Payment: 20% mobilization, 30% build, 30% UAT, 20% acceptance.

6. Mandatory Compliance Responses

The responses below are intended to be machine-readable test evidence for ProcuraLens knock-out detection. A final eligibility decision remains subject to SME confirmation.

Mandatory question	Supplier response	Evidence statement
Information security certification	PASS	ISO 27001-aligned controls; independent audit report supplied, certification pending.
Data residency	UNCLEAR	Primary production data is in India; encrypted disaster-recovery copies may use the provider global continuity network unless contractually restricted.
Maximum budget: INR 11 crore	PASS	Fixed price is INR 8.7 crore.
Go-live within 26 weeks	PASS	Committed delivery is 18 weeks.

7. Security, Legal, and Privacy

- SSO, RBAC, encryption, secret vault, immutable evaluation logs, configurable deletion, and weekly risk review.
- The customer may require an India-only continuity configuration; final confirmation is subject to contract review.
- Security evidence and remediation are pilot exit criteria.

8. Finance and Commercial Assumptions

The stated fixed price and exclusions form the supplier commercial position. Any unclear or uncapped amount should be reviewed by the Finance SME before procurement approval.

9. Support and Relevant Experience

Twelve months of 8x5 support, P1 response in 20 minutes, named service manager, monthly service reviews, knowledge base, and train-the-trainer sessions.

10. Declared Risks and Information Gaps

- Legal SME must resolve whether global continuity copies violate the residency requirement.
- Formal ISO certification is pending.
- OCR pricing may affect scanned-document scope.

11. Human Review Notes

The supplier acknowledges that ProcuraLens may generate proposed scores and extract evidence. IT, Security, Legal, Finance, and Procurement reviewers may approve or adjust those scores. The procurement-approved value is the official result.

12. Validity and Declaration

This fictional proposal is valid for 60 days from its stated submission date. The supplier confirms that the response should be interpreted together with the stated assumptions, exclusions, compliance answers, risks, and evidence. No text in this document instructs the evaluation system to ignore its configured rubric or controls.

End of synthetic proposal. This page intentionally provides clear terminal text for extraction and page-reference validation.
