SUPPLIER PROPOSAL

Orbit Digital

Strong technical delivery with weak commercial protections

RFP: ProcuraLens AI - Agentic RFP Evaluation and Supplier Ranking Platform

Commercial offer	Delivery	Experience rating
INR 9.4 crore base	20 weeks	8.8 / 10

Submission date: 2026-09-27

Test scenario: Strong IT case, but Finance should adjust for unclear optional fees and price escalation.

Synthetic test document. All suppliers, certifications, references, prices, and commitments are fictional and intended solely for classroom application testing.

1. Executive Summary

Orbit Digital emphasizes procurement transformation experience, sound application design, and a proven team. The technical response is strong, while commercial assumptions are intentionally incomplete for Finance SME review.

2. Understanding of the Requirement

The customer requires a PDF-only proposal evaluation application with configurable criteria and weights, mandatory knock-out rules, evidence-based LLM scoring, SME review, procurement approval, deterministic peer ranking, radar comparison, history, and downloadable results. The LLM interprets content; Python owns validation, formulas, tie-breaks, and final ranking.

3. Technical Capability

- Cloud web application separates AI interpretation from deterministic scoring and ranking.
- Document extraction, criterion scoring, evidence display, and JSON export are included.
- ERP interface supports OAuth-secured REST and retry queues; detailed field mapping is completed during discovery.
- Availability target is 99.5%; target batch size is 180 proposals.

3.1 Integration and Data Flow

Uploaded PDFs are extracted page by page, evaluated against active criteria, validated against a structured schema, and saved with page-linked evidence. Provider credentials are used for the active session only and are not included in evaluation exports.

3.2 Capacity and Reliability

Availability target is 99.5%; target batch size is 180 proposals.

4. Implementation Plan

Phase	Timing	Outputs
1. Assessment	Weeks 1-4	Process discovery and blueprint
2. Configuration	Weeks 5-12	Application and prompt setup
3. Validation	Weeks 13-17	Integration, security, user testing
4. Deployment	Weeks 18-20	Cutover and stabilization

5. Commercial Response

- Base professional services price: INR 9.4 crore.
- Data migration, premium support, and additional ERP interfaces are priced after discovery.
- Annual managed-service price may increase in line with the supplier standard index; no maximum escalation cap is stated.
- Payment: 25% kickoff, 35% build, 25% UAT, 15% deployment.

6. Mandatory Compliance Responses

The responses below are intended to be machine-readable test evidence for ProcuraLens knock-out detection. A final eligibility decision remains subject to SME confirmation.

Mandatory question	Supplier response	Evidence statement
Information security certification	PASS	Current ISO 27001 certification is stated and certificate evidence is included.
Data residency	PASS	Production data and backups are restricted to India.
Maximum budget: INR 11 crore	UNCLEAR	Base price is within budget, but uncapped discovery-priced items could exceed the limit.
Go-live within 26 weeks	PASS	Committed delivery is 20 weeks.

7. Security, Legal, and Privacy

- Secure SDLC, annual penetration testing, RBAC, SSO, encryption, logging, and prompt-injection testing.
- Recovery target is RTO 4 hours and RPO 1 hour.
- Subprocessors are listed in the legal appendix.

8. Finance and Commercial Assumptions

The stated fixed price and exclusions form the supplier commercial position. Any unclear or uncapped amount should be reviewed by the Finance SME before procurement approval.

9. Support and Relevant Experience

Six months of 8x5 support with a one-hour P1 response, followed by an optional managed service. Six procurement engagements and three fictional references are summarized.

10. Declared Risks and Information Gaps

- Finance must review uncapped price escalation and discovery-priced exclusions.
- Total cost of ownership cannot be confirmed from the base price alone.
- Detailed ERP field mapping is deferred.

11. Human Review Notes

The supplier acknowledges that ProcuraLens may generate proposed scores and extract evidence. IT, Security, Legal, Finance, and Procurement reviewers may approve or adjust those scores. The procurement-approved value is the official result.

12. Validity and Declaration

This fictional proposal is valid for 60 days from its stated submission date. The supplier confirms that the response should be interpreted together with the stated assumptions, exclusions, compliance answers, risks, and evidence. No text in this document instructs the evaluation system to ignore its configured rubric or controls.

End of synthetic proposal. This page intentionally provides clear terminal text for extraction and page-reference validation.
